

Turbine Specialties

All you need for absolute turbocharged performance.

When Turbine Specialties (TSI) began as a small turbocharger repair shop in 1972, its founders intended to set the company apart by offering

exceptional craftsmanship, total precision and a level of integrity and personal service beyond reproach. Today, as part of Cameron, that small, family business mindset remains, no matter how much our company grows and evolves. The TSI family is now well seasoned, with the resources and expertise to offer innovative solutions to

THE EDGE IS PRECISION

your most demanding challenges. Our on-time performance of 96-98% is no accident, either, and we accept nothing less from our suppliers. All because we are determined to be your sole source for the exchange and repair or purchase of new and remanufactured turbochargers for the oil and gas, marine, power generation,

nuclear, and rail industries. We prove it every day. There's no other way to make sure we give you the edge you deserve.

**QUALITY ASSURANCE**

TSI's sharp focus on uncompromising quality has always been our strength. Knowing that every product we have a hand in, whether new, used, repaired or exchanged, is destined to provide superior, trouble-free performance beyond all expectations is our goal. To that end, we adhere to extremely rigid quality assurance programs that leave virtually no margin for error. Our stringent policy requires a yearly certification process that involves the inspection, calibration and documentation of all measurement instruments and tools, up to and including those in our mechanics' own toolboxes.

And because our quality is only as good as the quality of every element involved, TSI demands that all outside suppliers also abide by our strict code of excellence. Perhaps this explains why, year after year, TSI warranty claims remain such a rarity.

LEAN & SIGMA

Using Six Sigma principles and techniques
Cameron aspires to greatness –
in the products we offer and the services
we provide – everyday

A Family of Experts

Emissions reduction specialists. As emissions standards tighten, the need for smart, creative solutions becomes more important than ever. TSI's engineering team, augmented by Cameron's aerodynamic/turbocompressor engineering staff, shines in this arena, using the industry's most advanced techniques. New designs are drawn using CAD technology, with CNC machining for TSI turbocharger designs.

The TSI HPO90G story. Here's perfect proof of the exceptional engineering and technological expertise we place at your disposal. The first new American-made turbocharger in almost two decades, the HPO90G has been completely and very successfully redesigned to boost power while significantly reducing exhaust emissions. Tell us what you're trying to accomplish, and your TSI team will help you make it happen.

On-site engineering. Only TSI gives customers a dedicated engineering team, ready to roll up their sleeves to solve problems quickly—over the phone if required. We can provide performance audits and make recommendations for upgrades and retrofits designed to keep you up and running profitably, year in and year out. We also offer customized turbocharger training at our customers' facilities, or in conjunction with Cameron's engine schools.

Expert repair services. TSI offers in-house precision welding and machining, a unique capability that gives you an extra edge. We also offer a top-notch unit exchange program, and we're available 24 hours a day, with a dedicated truck fleet at the ready for immediate pickup and delivery. Superior technology and equipment aren't the only benefits; our craftsmen have an average 17-year history with the company, which means they have valuable experience in every facet of our work.

The best names in the business. Nobody does more to make sure you have the latest, greatest turbocharger products and services possible, whether you need new or remanufactured equipment, expert repair or even a speedy exchange when the clock is ticking. **Original Equipment Manufacturer:** *Cooper-Bessemer[®], Delaval[®], Elliott[®].* **Repair and Exchange Service:** *ABB/Brown Boveri[®], Alco[®], Clark[®], Cooper[®], Elliott[®], EMD[®], Delaval[®], MAN[®], Napier[®].*

Super-streamlined facility. Our spectacular manufacturing facility in Salina, KS (pictured below) is an awe-inspiring model of operating efficiency and new technologies. Here, TSI brings together the entire range of turbocharger specialties, from product development and lean manufacturing to repair and testing to inventory and shipping in one ingeniously designed place. Thanks to the collaborative work of facility engineers and Six Sigma masters, customers enjoy even quicker response and a much more effective team effort.

Large, comprehensive parts inventory. TSI maintains a huge, multi-million-dollar source of new, used, rebuilt and aftermarket parts, complete turbos, and special tooling. Most of our OEM parts are manufactured on site to ensure quality control and reliability. Our system is computer based to give us an accurate, up-to-the-minute record of our inventory at all times, as well as the inventory we manage for our customers.

The CAMSERV™ connection. As a part of CAMSERV's comprehensive aftermarket team, TSI has the resources to give customers every possible advantage. Whatever challenge you face, whatever problem you must solve, aftermarket and technical support from a team of experts is always available through Salina or our dedicated 24-hour call center.

ANOTHER TSI EXCLUSIVE: Closed loop testing on site

Proper testing is vital to achieve exceptional results. Only TSI maintains sophisticated in-house testing capabilities for quick, reliable answers. A 6,166-square-foot test area houses two turbocharger test stands that permit testing of all our turbo lines. As a matter of policy, every new TSI turbocharger is tested before delivery, as are all new turbocharger upgrades when first developed. Upon request, customers are also welcome to take advantage of our testing and expert engineering analysis for rebuilt turbochargers.

CAMSERV Total Aftermarket Support CAMSERV, Cameron's aftermarket organization, offers a complete line of parts and field service support for these famous product lines:

Ajax®, Cooper-Bessemer®, Enterprise®, Superior®
