

Dräger Polytron 2 XP Ex Fixed Gas Detector

The Dräger Polytron 2 XP Ex is an explosion proof gas detector for continuous monitoring of combustible gases and vapors in ambient air. The transmitter converts the signal from a catalytic bead or IR sensor to a 4 to 20 mA analog or HART® or RS 485 digital signal output.

The unit is designed for one-man calibration, and offers a variety of diagnostics and self test features. The configuration and calibration of the transmitter is menu guided and easy to perform.

ONE MAN CALIBRATION

All setup and maintenance can be performed without opening the transmitter or declassifying the hazardous area. An infrared remote control, beaming through the window, gives full access to the menu and calibration procedure. The menu can also be accessed using the built-in push buttons or a HART® hand held terminal. All menu items and messages are displayed in plain English. Other, user selectable languages are French, Spanish and German.

DRÄGERSENSOR TECHNOLOGY

Dräger Polytron 2 XP Ex offers two sensing principles: catalytic combustion or infrared. The interior design of the catalytic bead sensor offers an extremely high sensitivity. Higher sensitivity also means shorter response times, higher accuracy and improved stability of the sensor signal. The advanced poison resistant DrägerSensor PR has a significantly longer lifetime.

The DrägerSensor IR is the sensor of choice, where 'poisonous' gases might be in the ambient air. Over time, these can damage the catalyst of a catalytic bead sensor, decreasing its sensitivity. In order to reduce maintenance costs for recalibration and exchange, the infrared technology offers a superior solution.

STAND ALONE SYSTEM

With the three built-in relays, Dräger Polytron 2 XP Ex can be used as an independent stand alone unit. Two adjustable gas alarm levels and a fault alarm make it convenient to switch warning devices on-site, without having to run cables back and forth to a central controller. The sensor signal can still be transmitted using either the 4 to 20 mA, HART® or RS 485 signal output.

FEATURES/BENEFITS

- Poison resistant catalytic bead sensor
- High performance infrared sensor
- Fast, accurate response
- Non-intrusive calibration
- Backlit LC-Display
- 4 to 20mA, HART®, RS 485 interface
- Multidrop capability, reduced wiring costs
- Optional relays on board
- ATEX, UL and CSA approved

TECHNICAL DATA

Type	Explosion proof transmitter		
Gases and Ranges	Combustible gases and vapors; 0 to 100 %LEL		
Display	Backlit LCD; 2 lines, 20 characters; resolution 1 %LEL		
Output Signal	Menu structure and messages in real text		
Relays (optional)	Analog	Normal operation	4 to 20 mA
		Warning, configurable	fault signal every 10 s for 1 s, or off; user programmable
		Maintenance	4 ± 1 mA 1 Hz modulation, or steady; user programmable
		Fault	< 1.2 mA
		Digital	HART®, RS 485
Supply Voltage	Two alarm relays, one fault relay SPDT; user programmable Rating: 5A 230 VAC, 5A 30 VDC		
Ambient Conditions	10 to 32 VDC, 3-wire		
Enclosure	Temperature	40 to + 175 °F / - 40 to + 80 °C *
